Subject: BMW Surety and Reclamation Contract Update - M/043/021

FYI - Mark Willis of BMW Stone dropped off his new \$25,000 surety bond during the noon hour today. He asked that I call him back to confirm delivery. Yesterday was the Division's deadline for submitting same. I have been in contact with Mr. Willis and his surety company several times this week and agreed to allow him another few days grace period since he was so close to getting the bond in to us.

I noted that Mr. Willis had failed to sign the surety bond agreement and also noted that he did not submit a new reclamation contract as previously directed by past Division correspondence.

I called Mr. Willis and advised him of these concerns and he agreed to come in Monday morning at 8:00 am to try and complete the balance of what is needed to finalize our approval. He said he had been told that all he needed to file to complete permit approval was the surety because a Reclamation Contract was already in place.

I told him that there was an older Reclamation Contract form on file that was attached to his earlier \$12,600 interim surety (CD). I found no revised MR-RC form in the file to go with the new surety bond. I will ask Joelle to type up a new form Monday morning based upon the older contract and we'll have to update it accordingly. We'll need to return his C.D. once we have the new surety bond finalized and approved.

A COPY OF THIS EMAIL MESSAGE WILL BE SENT TO THE MINE FILE - M/043/021.
